## Q5 Please identify what you think the top three water supply challenges are facing this region.

Answered: 127 Skipped: 3

ANSWER CHOICES	RESPONSES	
Groundwater contamination, pollution	33.86%	43
Lack of surface water supplies	15.75%	20
Water wasting, lack of water conservation	19.69%	25
Equitable access for low-income residents	6.30%	8
Climate change	20.47%	26

## Stanislaus and Tuolumne Rivers Groundwater Basin Association Stakeholder Survey

Over-population	22.05%	28
Lack of groundwater recharge projects	37.80%	48
Government regulation	32.28%	41
Environmental laws	22.83%	29
State Water Resources Control Board's Bay-Delta Plan	45.67%	58
Surface water supply uncertainty	20.47%	26
Over-draft by agriculture	33.86%	43
Other (please specify)	9.45%	12
Total Respondents: 127		

#	OTHER (PLEASE SPECIFY)	DATE
1	BAN FRACKING	8/19/2019 6:41 PM
2	Southern California stealing our water.	8/2/2019 10:38 AM
3	Lack of government incentives to support and encourage better agriculture water use	7/30/2019 9:40 AM

**Q7 If it is found that our region is pumping more water from the ground than nature can replenish on its own, which activities do you think should be considered to restore sustainability? (Check all that apply)**

Answered: 127 Skipped: 3

ANSWER CHOICES	RESPONSES	
On-farm water conservation programs	45.67%	58
Expand water recycling programs	55.91%	71
Build groundwater recharge projects	78.74%	100
Build/expand surface water storage projects	74.02%	94
Establish groundwater exchange markets	19.69%	25
Retire farmland	13.39%	17
Other (please specify)	25.98%	33
Total Respondents: 127		

#	OTHER (PLEASE SPECIFY)	DATE
1	Regulations to control what landscape can be used to minimize outdoor water use for non-food production purposes. Limiting flood irrigation will reduce ground water recharge.	10/23/2019 2:45 PM
2	tax ground water pimps	9/22/2019 5:54 PM
3	BAN FRACKING! Limit water sucking crops like almonds. Farmers waste water by using flooding. Many city sprinklers flood the streets. More incentives for landscape water conservation.	8/19/2019 6:41 PM
4	During the rainy season, we should put a dry well at every location that water puddles and is a hazard to the roadway. That would get the rain that normally evaporates into the ground water	8/15/2019 11:27 AM

## Stanislaus and Tuolumne Rivers Groundwater Basin Association Stakeholder Survey

5	Force farmers to use available ground water from irrigation districts instead of pumps that deplete our aquifer!	8/11/2019 2:04 PM
6	Limit the farming of 'luxury' and water hungry crops such as almonds and walnuts since no one need those to survive but are grown here with our resources and exported out of the country for monetary benefit only	8/9/2019 1:12 PM
7	Keep the California State government out of it, as much as possible.	8/2/2019 10:38 AM
8	Encourage farmers to water earlier the day	7/30/2019 9:40 AM
9	Why farms- they replenish the ground water	7/30/2019 8:22 AM
10	Urban conservation projects, using treated wastewater to irrigate parkland, golf courses, etc., like they do in the Bay Area. They have their purple piped systems in cities, such as San Ramon	7/26/2019 11:54 AM
11	provide tax incentives to property owners that capture rainwater for home reuse and/or plant xeriscape	7/23/2019 9:02 PM
12	WE DO NOT WANT OUR WATER BILL TO INCREASE. IN OTHER WORDS, IF ANY BUILDING OF PROJECTS DECIDED, THEN WE DO NOT WANT OUR BILL TO INCREASE.	7/23/2019 5:10 AM
13	get rid of excessive, false, ridiculous, environmental agencies and regulations. build, expand all resevoirs	7/21/2019 8:48 PM
14	Require coastal communities to build desalinization plants	7/20/2019 3:44 PM
15	Build more housing, more taxes to the region	7/20/2019 3:15 PM
16	Stop the issuing of permits for high capacity ag pumping and stop the pumpming of ground water by water districts into canals.	7/19/2019 1:19 PM
17	More Dams!	7/16/2019 10:14 PM
18	State wide desalination infrastructure	7/13/2019 7:36 PM
19	Regulate ground water usage on a wider scale perspective	7/13/2019 2:09 PM
20	Utilizing current irrigation infrastructure to increase groundwater recharge (i.e. run irrigation canals backwards with rainwater in their off season to recharge at local ag lands).	7/13/2019 10:00 AM
21	Stop sending water to other parts of the state!	7/12/2019 8:45 AM
22	Reduce the amount of water allowed for use by big ag, as they are the ones draining the aquifers; do not allow farmland to be used for more ag projects (both animal and plant) and instead, come up with sustainable plans for land use - or leave as is; allow small family farmers to remain (e.g., less than 50 acres)	6/19/2019 9:54 AM
23	stop taking our water and selling to someone else	6/14/2019 1:29 PM
24	conversion of rangeland to cropland that requires irrigation by pumping from the aquifer should be prohibited.	6/13/2019 10:26 AM
25	Stop allowing orchards to pump ground water to irrigate.	6/7/2019 4:17 PM
26	New development &/or crop land should provide plans for sustainable sources of water (as opposed to past practice of simply drilling deeper wells!). If the cost of long term sustainable water is too high, then the project is inherently economically not viable.	6/7/2019 2:29 PM
27	Bild dams	6/5/2019 4:06 PM
28	Meter the use of all groundwater	6/5/2019 9:42 AM
29	Desalinization!!!!!!!!!!!!!!!!!!!!!!- must increase water supply	6/5/2019 7:13 AM
30	All groundwater pumping should be metered and regulated.	5/10/2019 9:05 AM
31	Tax payers have already voted for more storage. But tell me if they have done anything or just wasting money	5/8/2019 8:08 PM
32	Lack of Irritation Improvement Districts for Ag Surface Water Conveyance	5/8/2019 5:51 PM
33	Residential conservation programs with enforcement	5/6/2019 8:40 AM

## Q8 How would these activities be paid for if established? (Check all that apply)

Answered: 127 Skipped: 3

ANSWER CHOICES	RESPONSES
Reduce pumping so no one pays	12.60% 16
Use existing fees/taxes	55.91% 71
Fees on groundwater pumpers	44.09% 56
Fees on all water users	38.58% 49
Fees on wastewater customers	14.96% 19
State/federal grants	60.63% 77
Other (please specify)	17.32% 22
Total Respondents: 127	

#	OTHER (PLEASE SPECIFY)	DATE
1	Water meters on all wells private, ag and municipal. Apply all watering day and time restrictions to everyone, not just municipal customers.	10/23/2019 2:45 PM
2	This is a hard question, and I really don't know.	10/22/2019 9:34 PM
3	Please no more taxes, we are being taxed and taxed, taxed for everything new that comes up. How about the state make a budget for this program	10/21/2019 8:16 PM
4	new taxes on large farms and more corporate taxes	9/22/2019 5:54 PM

## Stanislaus and Tuolumne Rivers Groundwater Basin Association Stakeholder Survey

5	If new fees are required, strive for strong linkage between source and use of funds. Rules for allowable uses of the funds should include penalties/fees to prevent/discourage confiscation or "mission creep" like what has occurred with Cap & Trade funds (ex: "borrowing" w/o repayment by the state general fund, disproportionate allocation to bullet train, recent allocation to drinking water projects).	9/1/2019 1:17 PM
6	Farmers don't pay enough for water and they waste the most. They are all planting almond orchards which use way too much water. They should not be pumping ground water either. Families who rely on ground water will have their wells go dry. We already pay too much for water.	8/19/2019 6:41 PM
7	Road tax money for what I suggested because it is a road safety issue	8/15/2019 11:27 AM
8	Enough fees and taxes paid now	7/30/2019 8:22 AM
9	Uncertain which type of fees would be the most viable	7/26/2019 12:03 PM
10	You collect enough county taxes as it is. With efficient money management, you should be able to pay for these.	7/26/2019 11:54 AM
11	WE THE CUSTOMER DO NOT WANT OUR BILL TO INCREASE. THE STATE HAS BILLIONS, LET THEM PAY.	7/23/2019 5:10 AM
12	Fees on water districts	7/19/2019 1:19 PM
13	The state has enough money, use what we have by allocating more appropriately	7/12/2019 8:45 AM
14	Hefty fees on big ag; don't put on residential and small family farms - they are not the problem!	6/19/2019 9:54 AM
15	Orchard fees/taxes	6/7/2019 4:17 PM
16	Put the private sector in charge of water supply	6/5/2019 7:13 AM
17	A base per acre fee for all landowners to cover GSA operations and GSP preparation. Groundwater pumping fees proportionate to contribution to landowners' contribution to overdraft.	5/14/2019 4:25 PM
18	quit building and adding more people	5/8/2019 8:08 PM
19	JPA Financing Authority, user paid , County & District Paid	5/8/2019 5:51 PM
20	if groundwater is over drafted there should be rights established for first in last out, like Nevada	5/8/2019 4:58 PM
21	Fees that scale up as a given user uses more per acre of land owned (e.g., 3rd or 4th acre-foot is more expensive than the 1st or 2nd)	5/8/2019 3:25 PM
22	Rebates for those who conserve, fees that increase as water use increases, no breaks for ag use	5/6/2019 8:40 AM

## Q9 Would you be interested in participating in any of the following GSA activities?

Answered: 77 Skipped: 53

ANSWER CHOICES	RESPONSES	
Attend Board or Advisory Committee meetings	54.55%	42
Serve on a committee	35.06%	27
Participate in a community workgroup focused on SGMA and groundwater topics	45.45%	35
Host a meeting for GSA staff to share information (e.g. service club or community groups)	5.19%	4
Participate in additional, more detailed surveys	61.04%	47
Total Respondents: 77

**Q12 Which of the following water supplies do you have for irrigation?  
(Check all that apply)**

Answered: 22 Skipped: 108

ANSWER CHOICES	RESPONSES	
Modesto Irrigation District	40.91%	9
Oakdale Irrigation District	36.36%	8
Riparian Water Rights - Stanislaus River	0.00%	0
Riparian Water Rights - Tuolumne River	4.55%	1
Ag well(s)	63.64%	14
Drainage well	4.55%	1
Other (please specify)	18.18%	4
Total Respondents: 22		

#	OTHER (PLEASE SPECIFY)	DATE
1	stop all water to new almond growers	6/14/2019 1:36 PM
2	Del Puerto Water District, Patterson Irrigation District, West Stanislaus Irrigation District	5/10/2019 8:06 AM
3	Stored Storm Water for Irrigation purposes	5/8/2019 6:00 PM
4	In this area, only ag wells. In other parts of California, we have other sources not listed.	5/8/2019 3:31 PM

### Q13 How many acres do you farm (including land in fee title and lease)?

Answered: 20 Skipped: 110

ANSWER CHOICES	RESPONSES
Less than 250 acres	55.00% 11
250 to 500 acres	10.00% 2
500 to 1,000 acres	5.00% 1
1,000 to 2,000 acres	10.00% 2
More than 2,000 acres	20.00% 4
<b>TOTAL</b>	<b>20</b>

## Q14 How long have you or your family been farming and ranching in this area?

Answered: 21 Skipped: 109

ANSWER CHOICES	RESPONSES	
1 to 10 years	0.00%	0
10 to 20 years	14.29%	3
20 to 30 years	9.52%	2
30+ years	76.19%	16
TOTAL		21

### Q15 What type of farm/ranch do you manage/own? (Check all that apply)

Answered: 21 Skipped: 109

ANSWER CHOICES	RESPONSES
Dairy	14.29% 3
Other livestock	23.81% 5
Row crops	14.29% 3
Tree nuts	80.95% 17
Tree fruit	19.05% 4
Vineyard	14.29% 3
Nursery crops	0.00% 0
Total Respondents: 21	

## Q16 How many functioning ag wells do you operate within the GSA?

Answered: 19 Skipped: 111

ANSWER CHOICES	RESPONSES	
1	47.37%	9
2 to 5	21.05%	4
More than 5	31.58%	6
TOTAL		19

## Q17 Do you have a flow meter installed on your well(s)?

Answered: 19 Skipped: 111

ANSWER CHOICES	RESPONSES	
Yes	47.37%	9
No	52.63%	10
TOTAL		19

## Q18 Do you perform water quality tests on your well(s)?

Answered: 21 Skipped: 109

ANSWER CHOICES	RESPONSES	
Yes	85.71%	18
No	14.29%	3
Don't know	0.00%	0
<b>TOTAL</b>		<b>21</b>

## Q19 When was the last time you constructed a well?

Answered: 21 Skipped: 109

ANSWER CHOICES	RESPONSES
Within the last 12 months	14.29% 3
1 to 5 years ago	38.10% 8
5 to 10 years ago	14.29% 3
More than 10 years ago	33.33% 7
TOTAL	21

## Q20 In your most recent well construction, how deep did you go?

Answered: 21 Skipped: 109

ANSWER CHOICES	RESPONSES
Under 300 feet	33.33% 7
300 to 500 feet	33.33% 7
500 to 700 feet	28.57% 6
More than 700 feet	4.76% 1
TOTAL	21

## Q21 What is the percentage of wells that you replaced in the last 10 years?

Answered: 21 Skipped: 109

ANSWER CHOICES	RESPONSES	
None of my wells	66.67%	14
Less than 25%	28.57%	6
25 to 50%	0.00%	0
50 to 75%	0.00%	0
More than 75%	0.00%	0
All of my wells	4.76%	1
<b>TOTAL</b>		<b>21</b>

## Q22 During California's recent 2012-2016 drought, what reductions in water levels did you experience in your ag production wells on an average annual basis?

Answered: 20 Skipped: 110

ANSWER CHOICES	RESPONSES	
Up to 10 feet per year	40.00%	8
10 to 15 feet per year	0.00%	0
15 to 20 per year	0.00%	0
More than 20 feet per year	0.00%	0
I haven't monitored water levels	60.00%	12
<b>TOTAL</b>		<b>20</b>

## Q23 In a wet year, how many feet of water did your wells recover?

Answered: 20 Skipped: 110

ANSWER CHOICES	RESPONSES	
I don't know	65.00%	13
No recovery	0.00%	0
About 5 feet	15.00%	3
About 10 feet	10.00%	2
About 15 feet	5.00%	1
About 20 feet	0.00%	0
More than 20 feet	5.00%	1
<b>TOTAL</b>		<b>20</b>

## Q24 Did you experience operational issues or well problems during the drought of 2012-2016?

Answered: 20 Skipped: 110

ANSWER CHOICES	RESPONSES
Water levels falls below the pump/well went dry	5.00% 1
Casing collapse/other well failure	0.00% 0
Water quality changes	10.00% 2
I didn't experience operational issues or well problems	80.00% 16
Other (please specify)	10.00% 2
Total Respondents: 20	

#	OTHER (PLEASE SPECIFY)	DATE
1	put in new pipe in well	6/14/2019 1:36 PM
2	Did not own property during 2012-2016	5/8/2019 3:31 PM

## Q25 Which of the below activities would you consider for your farming/ranching operations IF they became groundwater sustainability plan options for this subbasin? (Check all that apply)

Answered: 19 Skipped: 111

ANSWER CHOICES	RESPONSES
Spread water on my cropland during the winter for groundwater recharge	47.37% 9
Construct permanent groundwater recharge basin on my property	47.37% 9
Fund construction of groundwater recharge basin elsewhere	21.05% 4
Sell groundwater pumping rights	15.79% 3
Buy groundwater pumping rights	36.84% 7
Retire my land from ag production	0.00% 0
Purchase surface water to supplement ag production wells	63.16% 12
Other (please specify)	15.79% 3
Total Respondents: 19	

#	OTHER (PLEASE SPECIFY)	DATE
1	you just leave the water alone	6/14/2019 1:36 PM
2	Use more flood irrigation in my water management plan	6/5/2019 7:54 AM
3	Build Ag Surface Water Improvement Districts for Irrigation purposes	5/8/2019 6:00 PM

## Q26 What are your ideas or suggestions we should consider for our region's groundwater sustainability plan?

Answered: 12 Skipped: 118

#	RESPONSES	DATE
1	Offer funding for irrigation districts to install pressurized distribution systems delivering surface water efficiently to farmer drip and sprinkler systems. Also offer surface water basins. Increase river flows to a healthy level, no stagnant water	8/15/2019 7:56 PM
2	get as much rain water run off into recharge ponds or dry wells to help recharge our groundwater	8/15/2019 11:33 AM
3	Build more storage for surface water!!	8/1/2019 12:25 PM
4	Limit pumping by most recent developments first.	6/18/2019 1:55 PM
5	you just leave the water alone	6/14/2019 1:36 PM
6	Use of stormwater (if and when available) for winter crop flooding.	6/5/2019 7:54 AM
7	Expand Surface Water Storage and recharge systems	5/10/2019 8:49 AM
8	Wells are used only for insurance during a drought, with reliable surface water allocations we rarely use our wells	5/10/2019 8:06 AM
9	Require Irrigation Districts to offer water sales to local buyers at reasonable prices. Develop ground water recharge	5/10/2019 7:29 AM
10	Build Ag Surface Water Improvement Districts for Irrigation purposes	5/8/2019 6:00 PM
11	establish a water ground water right based on the year the well was drilled and put into service	5/8/2019 5:02 PM
12	Introduce market-based systems for water to flow to the highest and best use. So buy/sell pumping rights and marginal tax on incrementally more & more pumping (4th AF more than 1st AF) feel right. Outright restrictions on pumping would not be market based. Let users feel the true cost of implementing SGMA, then let them decide whether they want to bear that cost or sell pumping rights and retire land willingly.	5/8/2019 3:31 PM

## Q27 Who else should we listen to?

Answered: 6 Skipped: 124

#	RESPONSES	DATE
1	Industrial commercial businesses, irrigation districts and Tuolumne river preservation agencies	8/15/2019 7:56 PM
2	Groundwater scientists.	6/18/2019 1:55 PM
3	you just leave the water alone just leave the small person alone	6/14/2019 1:36 PM
4	Ag Groups who have lived in these areas for multiple generations	5/10/2019 8:49 AM
5	Irrigation Districts, water users and well drillers, there is a lot of historical knowledge between them.	5/10/2019 8:06 AM
6	N/a	5/8/2019 3:31 PM

### Q35 If you rated the quality of your drinking water as "poor," what are the reasons you gave your water quality a poor ranking? (Check all that apply)

Answered: 32 Skipped: 98

ANSWER CHOICES	RESPONSES	
Taste, chlorine	59.38%	19
Taste, "hard" water, too many minerals	43.75%	14
Odor	25.00%	8
Appearance or color	3.13%	1
Concern over information contained in the water quality reports from my water provider	43.75%	14
A trusted source has told me it's not safe to drink	12.50%	4
I've assumed it's not safe to drink, but don't have proof	9.38%	3
Total Respondents: 32		

### Q36 Do you have a private groundwater well?

Answered: 71 Skipped: 59

ANSWER CHOICES	RESPONSES	
Yes	1.41%	1
No	98.59%	70
TOTAL		71

### Q37 If yes, what do you use it for?

Answered: 2 Skipped: 128

ANSWER CHOICES	RESPONSES
Supplemental supply	100.00% 2
Outdoor irrigation	0.00% 0
Other (please specify)	0.00% 0
<b>TOTAL</b>	<b>2</b>

#	OTHER (PLEASE SPECIFY)	DATE
	There are no responses.	

### Q38 If you own a well, did you have operational issues or well problems during the drought of 2012-2016?

Answered: 0 Skipped: 130

 No matching responses.

ANSWER CHOICES	RESPONSES	
Water levels fell below the pump/well went dry	0.00%	0
Casing collapse/other well failure	0.00%	0
Water quality changes	0.00%	0
Other (please specify)	0.00%	0
<b>TOTAL</b>		<b>0</b>

#	OTHER (PLEASE SPECIFY)	DATE
	There are no responses.	

## Q39 What are your ideas or suggestions we should consider for our region's groundwater sustainability plan?

Answered: 37 Skipped: 93

#	RESPONSES	DATE
1	Build more infrastructure to collect more surface water, Limit urban growth in Southern California to reduce demands on water supplies in central and northern California.	10/24/2019 9:24 AM
2	Given that 40 % of recharge is from rivers, place monitoring wells near waterways to better understand the gage level where aquifer recharge is occurring to optimize river gage for recharge whenever possible. Given that agricultural flood irrigation accounts for more than 40% of the recharge, institute programs during wet years to reward farmers for applying more than their 42" per acre allotment to aid in recharge. Public Information Campaign to educate the public on this.	10/23/2019 2:52 PM
3	More public education. Perhaps hold public forum discussions at the library and the Gallo center. The MID "To the last drop" campaign is effective at catching attention, but what does it really mean? We also need people to realize that water use (ground and surface water) has to do with *everyone*, not just "the town people", not just "the farmers", nor just "the environmentalists", but "all of US". Especially in this state, it is very hard to get a detailed, engaging, thorough, *unbiased* account on water usage, because water is the root of all California power and politics.	10/22/2019 9:40 PM
4	Not an expert, but just utilizing best practices methods for keeping our groundwater to the best level possible. Modesto used to have some of the greatest tasting water around.	9/30/2019 1:36 PM
5	farms should not extract more water then the yearly recharge rate. Farm land that is pimping water should pay full taxes ( no Williamson act ) on the land and water used.	9/22/2019 5:58 PM
6	I wish you success with addressing the difficult issues such as: uncertainty of surface water availability (ex: state water grab), groundwater "ownership" (what's under my land is mine), groundwater "banking" (re-charge water I paid for this year is mine to use in the future), groundwater "market" (ex: being paid to fallow land vs fallowing due to water unavailability) and the one with the deepest well and/or is willing to pay the most for the water "wins".	9/1/2019 1:46 PM
7	Most importantly, BAN ALL FRACKING!!! It uses a SUBSTANTIAL amount of water and permanently pollutes it, not to mention causing earthquakes and methane emissions that are the major cause of global warming. They then use it to irrigate our food and poison us. We need to stop this horrible practice forever. Farmers pay very little for water and find no need to conserve water. They plant water hungry plants like almond trees, and then flood irrigate which wastes too much water. We need to start by restricting the number of water hungry crops, but also work on recharging the ground water, and encouraging more people to remove their lawns and put in drip via financial incentives and make it easier to do (the time limit and plant restrictions have kept me from taking the leap, although I did remove my back lawn for gardening.	8/19/2019 6:44 PM
8	Better water recycling on impervious surfaces such as parking lots and garages. Properly use and store water from rainfall and other sources very carefully so when needed water is easily accessible.	8/13/2019 2:32 PM
9	lift water restrctions	8/3/2019 3:43 PM
10	Reduce pumping, more drip irrigation, more incentives for farmers, encourage our cities to develop more dense housing with smaller or no yards. Government agencies should stop working bubbles, city zoning and development affects our water, water agencies should participate in those planning efforts.	7/30/2019 9:43 AM
11	Encourage people to use water basins for watering. the water will still go in the ground but it gets used once first	7/26/2019 12:05 PM

## Stanislaus and Tuolumne Rivers Groundwater Basin Association Stakeholder Survey

12	Write it in normal English, not bureaucrat speak or engineering talk, so the general public can understand it. Keep it simple, if possible, while providing the necessary information. Use the E. San Joaquin Subbasin draft GSP as an example of how NOT to write a plan. I had to call the county's senior soils engineer to have explanations of some of the proposals, and I'm involved with water. Use real-world data. Don't assume ag uses 80% of the water. First, ag does NOT use 80% of the water and not even 80% of the developed water. Look at how urban water users can reduce use, like not watering streets, reduce sprinklers that water half the street in front of a school, etc.	7/26/2019 11:59 AM
13	I notice there are a lot of farmers using drip irrigation and this should be encouraged if it is possible. Same for home use. There is no need to flood the streets to keep your lawn green. Encourage urban forestry, rain capture and exact use (i.e. drip irrigation) discourage golf courses, green lawns (accept public parks...drip irrigated or course), anything that is water intensive and does not provide food. we need to come to terms with the fact that the population will continue to grow and we need to consider clean water as well as food supplies.	7/23/2019 9:14 PM
14	Access to drinking water and sanitation Low income/other marginalized demographic access to drinking and sanitation water, particularly schools, health facilities.	7/22/2019 11:00 AM
15	Limit the number of tree growers. Keep some land for raising live stock.	7/22/2019 10:08 AM
16	expand all water storage areas, build new ones to collect sufficient water in the years we get good rain	7/21/2019 8:54 PM
17	Can NOT continue to hook up NEW water connections without NEW water.	7/21/2019 2:22 PM
18	More dams	7/21/2019 9:33 AM
19	BUILD DAMS!,,,,,,	7/21/2019 8:13 AM
20	We should have rates that are high enough to build and maintain the infrastructure needed to deliver water. We should stop allowing private individuals to monetize public water by reselling outside of the water basin.	7/20/2019 3:50 PM
21	Water pure and clean, with a pleasant taste. Fewer farms, build more housing, beautify, clean up to bring more people from Bay Area. Build more retirement homes for active adults, gated communities. Even the grocery stores have no sense of pride, Save Mart floors all need replaced. Some corporate signs faded, neighborhoods need tree trimming on a regular basis, etc. Let's get our neighborhoods clean again. Encourage higher paying employment jobs, technology jobs, etc. Lets work to make Modesto a better, cleaner place to live. Less gangs, thief, etc. Let's make Modesto a safe place to live and enjoy, with a sense of pride. I don't feel that here in Modesto.	7/20/2019 3:35 PM
22	Stop "pumping for profit". Place moratorium on permits for large cap ag pumps.	7/19/2019 1:24 PM
23	Give credits to people who flood irrigate. That recharges ground water.	7/16/2019 10:19 PM
24	Build more dams, raise the existing dams	7/14/2019 9:44 PM
25	Regulate pumping based upon the idea that groundwater is not always a local issue. Groundwater should not just be regulated by how big and deep you can dig a well	7/13/2019 2:12 PM
26	personal/commercial and agricultural conservation practices	7/13/2019 7:53 AM
27	Again, stop sending our water to other parts of the state	7/12/2019 8:48 AM
28	better ways to recycle water better use of " gray" water in new home construction credit for water conservation not higher water prices	7/5/2019 2:55 PM
29	Keep website current forever	6/24/2019 4:21 PM
30	Bring in other types of businesses to the area that don't depend on water (i.e., big ag), so large commercial growers can be reduced; promote small family farms and personal growth of food; we have food in excess, but it's always about making money so large ag says "without water we can't feed the world." That's a lie.	6/19/2019 9:57 AM
31	Recharging ground water aquifers during high capacity reservoir years	6/8/2019 5:13 PM
32	You need to change the perception that this is just a problem for farmers! It has taken the better part of a century for us to get into this mess, and it will take the cooperation of everyone and years to fix. Don't make the mistake of coming up with a "plan" first and then trying to convince municipal users and environmental groups to support it. These are complicated issues and the solutions are not obvious, hence the importance of consensus in developing a plan.	6/7/2019 2:48 PM
33	Ground water recharging efforts are important. Become part of Hetch Hetchy Water District.	5/19/2019 8:36 AM

## Stanislaus and Tuolumne Rivers Groundwater Basin Association Stakeholder Survey

34	Focus on how to pay for implementation. SGMA is an underfunded mandate. In-lieu Recharge potential is huge in this area both within cities and on-farm.	5/14/2019 4:30 PM
35	Meter and regulate all groundwater pumping -- especially large farms, corporate farms and industries. My water use is metered; why not everyone's?	5/10/2019 9:14 AM
36	Limiting new wells, monitoring ground water use and restricting or increasing fees based on usage. Consider other water sources. Reduce our eliminate sources of groundwater pollution.	5/6/2019 8:47 AM
37	1.WE SHOULD NOT RELEASE SO MUCH WATER FOR THE FISH. 2.WE NEED TO KEEP THE SALT WATER FROM COMMING UNDER THE GROUND AND TAKING OVER WE EMPY UNDER GROUND WATER.	4/24/2019 6:23 AM

## Q40 Who else should we listen to?

Answered: 23 Skipped: 107

#	RESPONSES	DATE
1	Programs currently located in adjudicated water basins that are working. Mimic what works and what doesn't and adopt their approach is applicable.	10/23/2019 2:52 PM
2	Don't know	9/30/2019 1:36 PM
3	the river trust TRT	9/22/2019 5:58 PM
4	Find ways that commercial and industrial can conserve water too.	8/19/2019 6:44 PM
5	I'm still learning myself	7/26/2019 12:05 PM
6	Unfortunately, most of the people who comment on these types of plans have vested interests or they're retirees who have nothing better to do and really don't understand the proposal. You can't not exclude them because this is an all-inclusive process.	7/26/2019 11:59 AM
7	scientists. people that spend their lives studying the subject to better understand the world.	7/23/2019 9:14 PM
8	God	7/21/2019 8:54 PM
9	BUILD DAMS,,!,,,,,,	7/21/2019 8:13 AM
10	Your customers, local, state and federal government.	7/20/2019 3:35 PM
11	Farmers	7/20/2019 8:50 AM
12	Beside concerned citizens, Mother nature, and God.	7/19/2019 1:24 PM
13	Industrial users - often times they have advanced water conservation techniques that could be applied large scale.	7/13/2019 10:02 AM
14	everyone--all ideas may contribute	7/13/2019 7:53 AM
15	Listen to only people who live and work in Stanislaus County.	7/12/2019 8:48 AM
16	Experts and those experienced from similar Subbasins	6/24/2019 4:21 PM
17	Non-profits and academia that do research on groundwater; not people who have profits at risk.	6/19/2019 9:57 AM
18	Everyone. They may not be interested now, but if you develop a plan they don't like you will hear from them later!	6/7/2019 2:48 PM
19	Stakeholders before consultants, then consultants.	5/14/2019 4:30 PM
20	Well, perhaps you should not be acting on behalf of corporate interests with huge conflicts of interest. Stop listening to parties working for huge private profits over public interest.	5/10/2019 9:14 AM
21	I wish I knew more. I've just begun noticing the horrid smell from our tap water and have become concerned; concerned enough to consider relocating.	5/9/2019 9:43 AM
22	Climate scientists, environmental scientists, water specialists free from ties to large ag businesses.	5/6/2019 8:47 AM
23	MID	2/26/2019 2:26 PM

**Q41 Thank you for completing our survey! If you fit any of the below categories within this subbasin, please select and provide your responses in that category, or simply click "I'm Done!"**

Answered: 68 Skipped: 62

ANSWER CHOICES	RESPONSES	
I operate one or more ag production wells	0.00%	0
I operate one or more private domestic wells	1.47%	1
I am a commercial/industrial water user	1.47%	1

## Q79 Which of the below activities would you consider or support IF they became elements of a groundwater sustainability plan for this subbasin? (Check all that apply)

Answered: 27 Skipped: 103

ANSWER CHOICES	RESPONSES	
Install water conservation equipment at my property	44.44%	12
Convert landscape on my property to drought tolerant	48.15%	13
Allow construction of groundwater recharge project on my property	44.44%	12
Pay fees to construct a groundwater recharge projects to benefit my community	37.04%	10
Other (please specify)	25.93%	7
Total Respondents: 27		

#	OTHER (PLEASE SPECIFY)	DATE
1	No pumping groundwater to supply water on the canals	10/21/2019 8:33 PM
2	We irrigate regularly (10-12 or 14 day schedule) our 1.15 acre property now with runoff water from OID.	8/2/2019 10:47 AM
3	Not sure.	6/14/2019 12:57 PM
4	Restrict groundwater pumping by orchards.	6/7/2019 4:28 PM
5	I live adjacent to the Tuolumne river, my ground water is consistently recharged	6/5/2019 5:01 PM
6	Desalinization- simply must increase water supply. Manage the forests- loosing 100ks of acre feet to evaporation.	6/5/2019 7:17 AM
7	In good rain years when TID/MID have excess water I would allow additional irrigations on my property, earlier in the year or later in the year, even if I did not need it for my trees or plants, just for the purpose of recharging versus TID letting it go down the river and out to the ocean. Basicly allow passive recharge when ever TID had too much water even if it risked my trees getting over watered, which is what TID did in 2017.	5/1/2019 3:45 PM

## Q80 What are your ideas or suggestions we should consider for our region's groundwater sustainability plan?

Answered: 20 Skipped: 110

#	RESPONSES	DATE
1	Encourage farmer to use surface water irrigation Instead of flood irrigation Use drip irrigation	10/21/2019 8:33 PM
2	Put a limit on well installs. Stop building houses.	8/15/2019 7:59 PM
3	Conservation is important but so is water recharge. I'd love to see more projects in our area that focus in that direction.	8/14/2019 6:41 AM
4	Stop agricultural pumping and have them use irrigation water!	8/11/2019 2:08 PM
5	Regulate the big pumpers like the huge almond growers that have sprung up everywhere.	8/2/2019 10:47 AM
6	stop / reduce almond orchards with large pumps from pumping our ground water in the area	7/17/2019 10:22 AM
7	limit wells going in and regulate usage	6/14/2019 12:57 PM
8	I would like to see controls on the amount of ground water pumping for these thousands of acres of tree that have been planted in our area over the last 15 years. They seem to have little concern for the existing users that run dry due to over pumping by big companies with commercial wells.	6/12/2019 5:01 PM
9	Metering of new ag wells	6/12/2019 8:12 AM
10	Encourage irrigation during dry parts of the winter.	6/11/2019 2:34 PM
11	Stop pumping ground water to irrigate orchards!! Don't pump ground to supplement irrigation allotments.	6/7/2019 4:28 PM
12	Allow more surface water access thus diminishing the need for ground water.	6/6/2019 1:55 PM
13	Bild dams	6/5/2019 5:36 PM
14	n/a	6/5/2019 5:01 PM
15	Bild dams	6/5/2019 4:11 PM
16	Desalinization- simply must increase water supply. Manage the forests- loosing 100ks of acre feet to evaporation.	6/5/2019 7:17 AM
17	Recharge Projects	5/10/2019 8:49 AM
18	Use all available District Surface Water in our Groundwater Basins	5/8/2019 5:55 PM
19	Stop planting permanent set crops in eastern Stanislaus County	5/8/2019 5:17 PM

20

•Identify recharge areas near the foothill area where you can build canals from La Grange to feed the recharge areas to recharge during good rain years that produce high flood flows. •Build a canal system in the foot hills and the areas that do not have access to surface water to provide them water during good rain seasons when water is in abundance. • Connect reservoirs that are close enough to each other to pump water from one to the other to maximize capacity and minimize waste to the river • Set up a irrigation fee to use to purchase farm property which will be put out of production to meet sustainability goals, and to be used as recharge sites in years of excess water, and if possible to be purchased along the river edge to remove residential, commercial and industrial uses out of the flood plain and floodway, to minimize flood impacts and in some future be able to release more flow and possibly allow operations at Don Pedro to be modified to hold more water than the 1.7 million, the additional water could be used to recharge the land out of farm production. •Excavate Modesto Reservoir and Lake Turlock deeper for more storage and more percolation during good rain years. •Identify another area to create a new reservoir or expand the existing reservoir. •Areas that do not have access to surface water should highly consider only crops and trees which can be irrigated with drip irrigation to minimize impacts especially during a drought. •Have urban areas restrict outfalls to rivers and canals, and only allow retentions systems going forward, and work toward converting existing detention systems into retention systems. • Create a water bank amongst the agencies within the GSA to facilitate banking and exchange of water credit to add flexibility amongst the agencies to move water around as needed.

## Q81 Who else should we listen to?

Answered: 12 Skipped: 118

#	RESPONSES	DATE
1	Those in the watershed counties and those using the water as it passes through their region.	8/2/2019 10:47 AM
2	single family home owners who now are tired of almond orchards having no regulation on how much water they continually pump from the ground!	7/17/2019 10:22 AM
3	Anyone who does not have a vested interest, or can derive monies from their efforts.	6/19/2019 1:36 PM
4	Listen to rural communities who rely heavily on groundwater for all their needs.	6/17/2019 12:07 PM
5	Municipalities in our area. They provide most of the population with domestic water.	6/12/2019 5:01 PM
6	Department of Water Resources CSU Stanislaus UC Davis	6/12/2019 8:12 AM
7	You should listen to homeowners who live in the community and have a well. Corporate Ag owners are not invested in the best interest of single family private well operator.	6/7/2019 4:28 PM
8	Listen to farmers, ranchers, homeowners, pastors, and business people.	6/6/2019 1:55 PM
9	Farmers	6/5/2019 5:36 PM
10	n/a	6/5/2019 5:01 PM
11	Farmers	6/5/2019 4:11 PM
12	All the agencies participating in the STRGBAGSA and the WTS GSA should have their staff fill out this survey especially their water operators and maintenance staff, and those with water knowledge of their water systems.	5/1/2019 3:45 PM

**Q82 Thank you for completing our survey! If you fit any of the below categories within this subbasin, please select and provide your responses in that category, or simply click "I'm Done!"**

Answered: 33 Skipped: 97

ANSWER CHOICES	RESPONSES	
I operate one or more ag production wells	9.09%	3
I am a municipal water customer	3.03%	1
I am a commercial/industrial water user	3.03%	1
I'm Done!	84.85%	28
<b>TOTAL</b>		<b>33</b>

**OTHER****Q83 What are your ideas or suggestions we should consider for our region's groundwater sustainability plan?**

Answered: 8 Skipped: 122

#	RESPONSES	DATE
1	Atmospheric water generator Stations along canals, High hill ground and in for farms as well. Also Reverse osmosis treatment systems for city waste water.	10/22/2019 10:48 AM
2	Recharge Basins, injection wells, urban water conservation, ag water limitation	8/9/2019 1:18 PM
3	Educate the public -conserve-washing street down, dirt washing down gutters- dirty gutters contaminating underground water catchers	7/30/2019 8:33 AM
4	Conservation & watching closely to whom we plan to sell our water and if we should sell if they don't have conservation steps in place.	7/20/2019 10:18 AM
5	I think California should move towards desalination as a main water source.	7/13/2019 7:39 PM
6	Metering of new ag wells	6/12/2019 8:10 AM
7	How will you engage the public and what time to ensure compliance and agreement?	6/5/2019 9:55 AM
8	More regional supply and recharge projects. Better inter-agency cooperation.	6/5/2019 7:49 AM
